As you will notice, the 1995 Crime in Kentucky captures arrests by the actual counts of individuals arrested as opposed to counts of arrest charges (which has been the format used prior to 1994). The FBI compiles and compares arrest data by actual counts of persons arrested. Therefore, in an effort to lend continuity to statistical studies, we changed this area of reporting in 1994, to comply with the law enforcement community. Because of this change making 1994 statistics the baseline for subsequent crime studies, you will be able to compare the 1994 and 1995 arrest data shown in Crime in Kentucky, but not to years prior to 1993.

It should further be noted that arrest data for non-computerized agencies is derived solely from the court copy of the actual citation, with the exception of DUI arrests, which are reported directly to the KSP Records Section.
